

# Canada Weather Station Distribution

A title helps understand what data is being projected on the map

Key explaining color coding helps understand province distribution

Rendering the ocean in a blue hue promotes observation of land mass distribution

- Province
- Alberta
  - British Columbia
  - Manitoba
  - Nanavut
  - New Brusnwick
  - Newfoundland & Labrador
  - Northwest Territories
  - Nova Scotia
  - Ontario
  - Prince Edward Island
  - Quebec
  - Saskatchewan
  - Yukon

Color swatch selection enables clear province differentiation without appearing chaotic

Trimmed window to widest data points minimizing unused space

Projected data into NAD 1983
